To achieve these objectives, we will explore subjects together and share ideas on teaching methods and topics about these people´ future learning needs and difficulties in ICT and E-working learning. The methodology will be based on surveys (**opinion polls**) to be performed by both students and by teachers. Moreover, participants
exchange visits
will be organized and will enable the teachers/researchers to experience other teaching techniques and practices. But central to this project is the fact that the students themselves are welcome to play an active role in the development of this project by cooperating to achieve the project goals by nourishing our conception of the state of the art. For this purpose, they will contribute by elaborating together with the teachers some of the contents of the
website
designed as a result of the project.

PHASE 1

Academic Year 2009/2010

PHASE 2

Academic Year 2010/2011
